

SUMMARY

Detail-oriented Frontend Developer with 3+ years of experience in React.js, specializing in responsive dashboards and data visualization. Enhanced user experience and operational efficiency through data-driven applications, reducing report turnaround from 2 days to on-demand. Proficient in API integration, Looker, and Kibana, driving informed decision-making and improved reporting accuracy.

EDUCATION

Bachelor of Computer Science Engineering

Jun '18 - May '22

Sathyabama Institute of Science and Technology

Chennai, IN

- CGPA: 9.1

PROFESSIONAL EXPERIENCE

SquareShift

Mar '23 - Present

Software Developer

Chennai, IN

LLM Observability Platform

- Elevated **performance & cost visibility** by deploying **React.js dashboards** to monitor large language model usage & expenditures, enhancing **internal tool adoption tracking**.
- Transformed **real-time data visualization** by leveraging **React, REST APIs, & Elasticsearch**, driving enhanced **decision-making & user experience**.
- Refined **per-user usage & cost aggregation logic** using **Python** across multiple AI tools, resulting in **improved reporting accuracy & data precision**.
- Elevated **user experience** by harnessing **Kibana dashboards & JavaScript frameworks** to validate **frontend data consistency & reliability**.

Eureka AI — Multi-Agent Platform (Google ADK)

- Developed a **responsive landing page** using **React.js, HTML, and CSS** with clean **UI patterns**.
- Revamped **secure login interface** using **React.js & component-based design** to significantly enhance **data security & user experience**.

Tableau to Looker Migration

- Optimized **data visualization & filters** by recreating **Tableau dashboards in Looker**, streamlining the **decision-making process** & improving **data accuracy** by ensuring all **metrics and calculated fields** matched the original reports.
- Enhanced **dashboard accuracy** by utilizing **Tableau** for in-depth **data validation & filter logic verification**, ensuring alignment with existing reports & driving improved **decision-making quality**.

Banking Report Automation UI

- Built a **React.js frontend** that allowed **bank operations teams** to **schedule, preview, and download** SQL-generated reports.
- Connected to a **Node.js + PostgreSQL backend** to run **parameterized queries** based on user-selected filters like **date range, account type, and region**.
- Reduced **report turnaround from 2 days to on-demand**, improving **operational efficiency** for **trade settlement teams**.

Concentrix Catalyst

Mar '22 - May '23

Software Developer

- Developed **production-grade frontend features** for an **enterprise banking trade platform** using **React.js**.
- Crafted **responsive UI components** utilizing **HTML, CSS, & JavaScript Bootstrap** to enhance **layout readability** & ensure **cross-browser & device compatibility**.
- Strengthened **system reliability** by engaging **backend & QA teams** through **SQL databases & JIRA**, achieving improved **data integration efficiency & operational performance**.

TECHNICAL SKILLS

- Programming Languages/Frameworks: Javascript, React Js, HTML, CSS, Node.js, Python
- Databases: SQL
- Data & BI: Looker, Kibana, Elasticsearch
- Version Control: GitHub Actions, GitLab
- Generative AI & LLM Technologies: Prompt Engineering, Google ADK, RAG (Retrieval-Augmented Generation – conceptual)

CERTIFICATIONS

- Google Data Analytics Associate Practitioner
- Crio. Do MERN Stack Developer Certification
